EXPERIENCE

The Tampa Bay Times

Investigative Data Reporter

Jun 2023 - Present

- Designed a methodology to analyze millions of water quality samples for an award-winning project that revealed how Florida waterways grew increasingly contaminated, even as state leaders touted restoration progress
- Built an interactive tool in three days using JavaScript, following reader feedback on the water quality project
- Analyzed every Atlantic hurricane track recorded since 1980, pinpointing how warming ocean temperatures statistically increased the chances of storm rapid intensification
- Completed quick-turn analyses for hurricanes; breaking news

The Baltimore Banner

Data Fellow

Jan 2023 - May 2023

- Conducted a comprehensive geospatial analysis highlighting an increase in gun violence near Baltimore schools, leading to months of follow-up stories
- Wrangled and analyzed demographic, crime and education data for feature and enterprise stories

The Dallas Morning News

Freelance Data Reporter | Data and Investigations Intern

Jun 2022 - Dec 2022

- Spearheaded data analysis for an ongoing national investigation on housing policy

The Howard Center for Investigative Journalism

Data Reporter | Investigative Reporter

Jan 2022 - Dec 2022

- Analyzed and visualized census data and state lottery vendor locations with R to supplement reporting on exploitative state lottery systems
- Wrangled data in JavaScript for a collaboratively created interactive news application
- Contributed to data analysis for a 2025 Pulitzer-finalist Associated Press investigation into police brutality
- Helped develop an automated system to dispatch and track hundreds of FOIA requests using R

The Diamondback

Data Editor | Assistant News Editor | Special Projects Editor

May 2021 - May 2023

- Reported and managed an enterprise project on campus accessibility, featured in a Washington Post column
- Filed weekly public records requests, analyzed data and created visualizations for news reporting and data projects
- Managed 16 journalists, including two data reporters, and edited section content while supporting writers throughout the journalistic process
- Covered city and campus development and contributed frequently to breaking reporting on COVID-19, elections and Prince George's County news
